ComputeSphere

Brand rules

1 Use the marks as provided: no redraw, recolor, stretch, rotate, effects or outlines.

2 Keep the clear space of one quarter of the mark's width, and stay at or above the minimum sizes: full logo 96 px wide, mark 16 px.

3 The gradient belongs to the logo, tiles and hero art. Never put it on body text or UI chrome.

4 Icons in the product UI are mono and take the text color. Duotone is only for marketing, onboarding, empty states and product headers.

5 Hero tier only at 48 px and up. Below 20 px, variant marks drop and the variant shows as text.

6 Never pair our icons with engine vendor logos.

Brand Blue
#355DEE

Brand Cyan
#61C2DA

Deep Blue
#3C5CAF

Ink
#0A0D12

Paper
#FAFBFC
